BOGE AIR. THE AIR TO WORK.

BOGE
COMPRESSED AIR SYSTEMS

SCREW COMPRESSORS

C SERIES

Over 100,000 compressed air users expect more when it comes to their compressed air supply.

BOGE air provides them with the air to work.

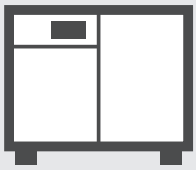
Screw compressors custom made by BOGE have for decades been synonymous with efficient and reliable compressed air supply to trade workshops through to industrial companies.

The BOGE C series is a trendsetter in its class: less noise, less pipework, less connections in contrast to more output, more individual configuration possibilities and more efficiency and requiring a minimum of space only. We have listened closely to the wishes of our customers – with the C series we provide the air to work.

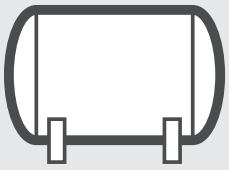
BOGE AIR. THE AIR TO WORK.

CONTENTS

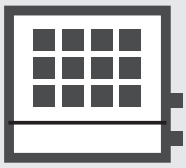
Compressed air with a method:
Modules of the BOGE C series.



Screw compressor



Compressed air receiver



Refrigerant dryer

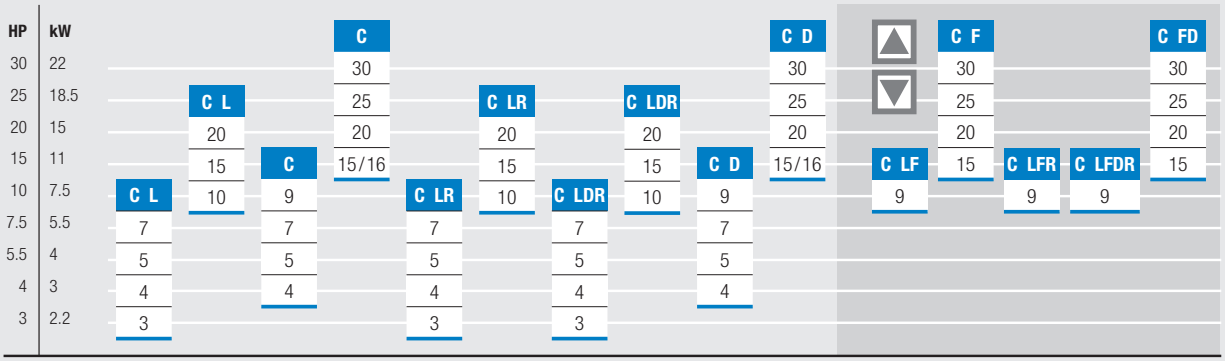
Frequency control

ADVANTAGES OF THE COMPACT MODULAR DESIGN:

- **Flexible combination possibilities**
- **Unit completely ready for connection**
- **Minimum flow losses due to compact construction**
- **High-quality piping protects against leakages**

Modular design, compact system: Because of the modular design BOGE screw compressors allow for individual configuration of your compressed air system. Each compact module is pre-assembled and ready for use: for efficient and reliable operation in all types of applications.

PERFORMANCE OVERVIEW OF THE C SERIES



frequency controlled

UNIQUE: BOGE GENUINE PARTS FOR THE C SERIES.

Only the use of BOGE original parts will enable you to benefit from the technological edge of the C series in the long run. To this purpose, BOGE offers individually customised replacement parts for the C series guaranteeing 100 percent quality and 100 percent service life. Only such original parts are compatible with the compressors of the C series – for maximum safety during the entire service life period.

Premium Efficiency: IE3 Motors
The C series compressors offer the best possible energy efficiency thanks to economical IE3 motors of the premium efficiency class.

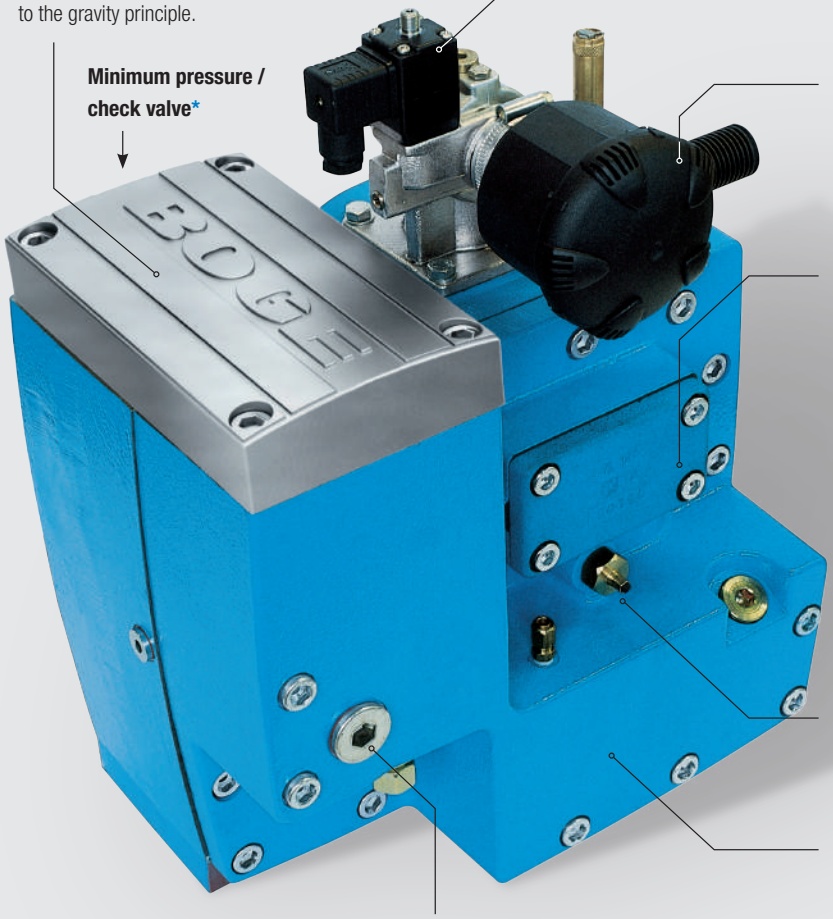
The C series up to 7.5 kW: Space saving and more energy efficient than ever!

Design advantages.

THE CM COMPACT MODULE:

All necessary components are integrated into the airend block. Maintenance and wear parts are easily accessible – for maximum comfort and highest operational safety.

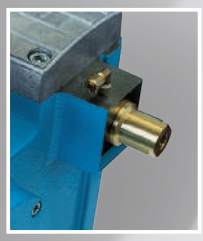
Integrated oil separating system
Both oil separating cartridge and oil filter cartridge are easily accessible: for maintenance purposes only the cover needs to be opened. The oil sump is located at the lowest point: for effective pre-separation according to the gravity principle.



Multifunctional intake control with integrated solenoid valve for functionally reliable operation without leakages.

Silenced intake filter with paper filter cartridge
The filter separates 99.9 percent of all particles larger than 3 µm: assuring high quality compressed air right at its source.

BOGE airend with special BOGE profile and HD bearing
The specially designed airend is characterised by its high output and low energy consumption.



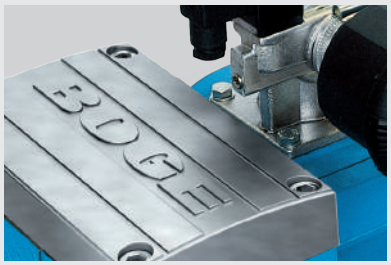
***Minimum pressure / check valve**
Integrated design eliminates piping – for maximum leakage safety.

Temperature sensor
For safe operation and optimal monitoring of the compressor.

CNC machined cast iron housing
High quality machining eliminates the risk of leakage. The heavy cast iron housing also serves to reduce noise right at the source.

Thermo-static oil level regulation
Easily accessible from the outside.

Compact & highly efficient! **The monoblock compact design of the airend range up to 7.5 kW offers distinct advantages. The integrated design minimises the number of oil pipes by clever internal routing – for a highly efficient and reliable compressor. At the same time the airend requires less space providing the user with a compact, space saving and energy efficient solution from BOGE!**



COMPACT DESIGN

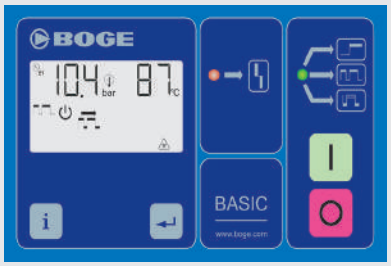
Integration of all essential components eliminates almost all interconnecting pipes. Leakages are virtually eliminated. Internal pressure losses are minimised.

EXTREMELY QUIET

Because of the sound adsorbing graphite casting the C series is very quiet in operation and vibration free. No further silencing is required. The canopy versions C series and C series with dryer are therefore super-silent with low sound pressure values.

HIGHEST EFFICIENCY

The BOGE airend design ensures industry leading specific power ratios (optimised output volumes at low energy consumption).



CONTROL

The compressor has the BASIC control system with LC display and pressure transducer technology. FOCUS control is available as an option that offers additional monitoring and control features. FOCUS is also programmed to act as a changeover switch and can control up to three compressors.

OPTIONAL FREQUENCY CONTROL

The frequency converter flexibly controls the motor speed and therefore the airend. This ensures the compressor output automatically adjusts to the momentary demand. Soft starting via the frequency converter also avoids undue wear and tear and prolongs the service life of the compressor.

OPTIONAL REFRIGERATION DRYER

The C series can be equipped with a refrigeration dryer as an option – either top mounted on a compressed air receiver or horizontally mounted. No additional space is required for the generation of dry compressed air.

Screw compressor **C 3 L** to **C 7 L**
Compressed air system **C 3 LR** to **C 7 LR**
Compressed air centre **C 3 LDR** to **C 7 LDR**

Effective free air delivery:
0.234 – 0.728 m³/min, 8 – 25 cfm

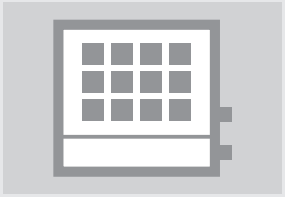
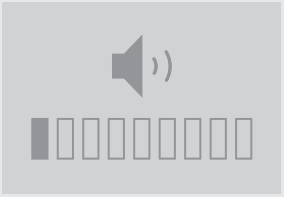
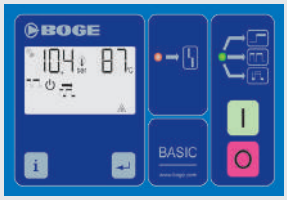
EFFICIENCY
The specially designed BOGE airend provides high output volumes at low energy consumption – for reliable and efficient compressed air supply.



REFRIGERANT DRYER
As an option the compressor can be supplied with a horizontal refrigerant dryer. No additional footprint is required.



EXTREMELY QUIET
All C series compressors are characterised by very low sound pressure levels due to their super-silenced cabinets.



CONTROL
BASIC control is the standard compressor controller with LC display and pressure sensor technology. The FOCUS control, offering additional monitoring and control options, is available as an optional extra.

Compact, efficient, very quiet: The space saving C series screw compressors are designed for long-term performance. A refrigerant dryer mounted on a horizontal receiver is available as an option. Even at full load operation the compressor operates reliably and safely at optimum efficiency providing a long service life.

FREQUENCY CONTROL
The frequency converter flexibly controls the motor speed and therefore the airend. This ensures the compressor output automatically adjusts to the momentary demand.

REFRIGERANT DRYER
The directly coupled, frequency controlled C series is equipped with a refrigerant dryer. This enables users to generate dry air without any additional space requirements.

MAXIMUM EFFICIENCY
The airend operates at the necessary speed to generate as much compressed air as is required. Expensive idling as well as load/no load cycles are thus eliminated. At the same time, a tighter pressure band can be maintained, also helping to save energy.

CONTROL
The compressor is controlled via the BOGE BASIC control with LC display and pressure sensor technology. The BOGE FOCUS control is available as an optional extra, offering further monitoring and control possibilities.

The ideal operating mode: In conjunction with the frequency controlled drive the directly coupled screw compressors of this series provide an extremely flexible system which spontaneously adapts to any changes in the customer's compressed air or pressure demands. In the event of a change of the pressure value, the output quantity is synchronised automatically. A 13 bar machine is thus transformed into an 8 bar machine yielding a correspondingly higher output – without any expensive remodelling or design related modifications.

* Free air delivery figures in accordance with ISO 1217, Appendix E, at 20ºC ambient temperature and maximum pressure. Emitted sound pressure levels from 72 dB(A) according to DIN EN ISO 2151:2009
** Max. pressure of the compressor
Ask for further receiver dimensions.

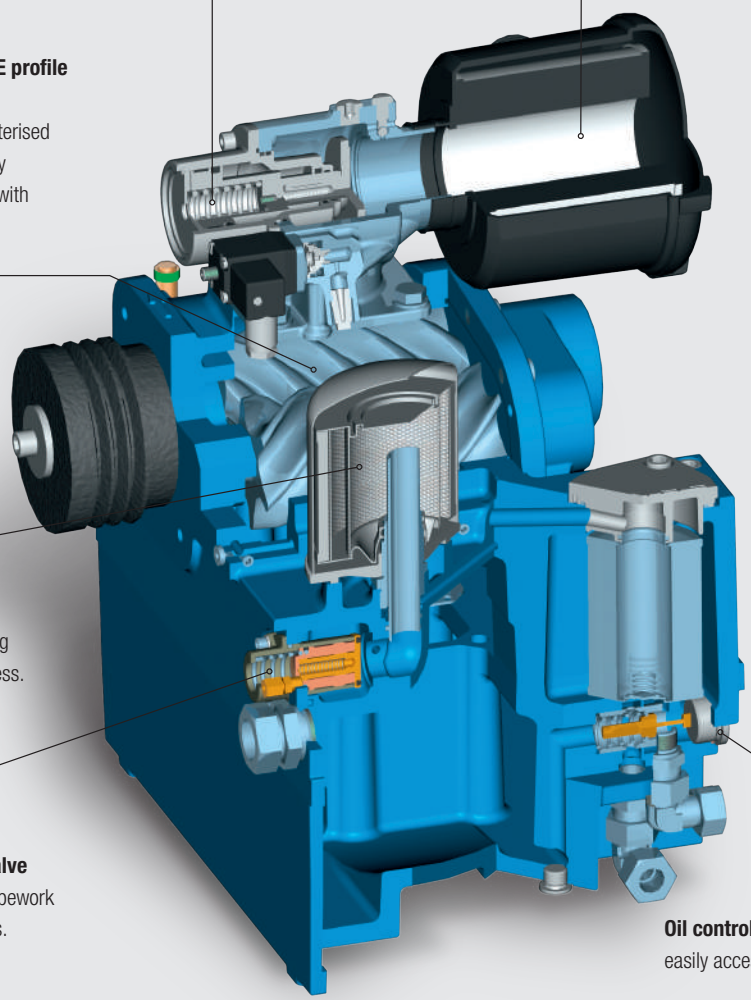
The C series up to 22 kW: This is the way compressors are made today!

Design advantages.

Multifunctional intake control with integrated solenoid valve for functionally reliable operation without leaks.

Silenced paper cartridge intake filter
This filter separates 99.9 percent of all particles larger than 3 µm: for high quality compressed air at its source.

Integrated airend with special BOGE profile and HD bearing
The specially designed airend is characterised by its high free air delivery at low energy consumption. Motor sizes up to 22 kW with free air delivery up to 3,62 m³/min.



Effective **oil pre-separation** harnessing the laws of gravity. Service friendly access.

Minimum pressure valve / check valve
Integrated design serves to eliminate pipework – virtually eliminates the risk of oil leaks.

Oil control valve
easily accessible from the outside.

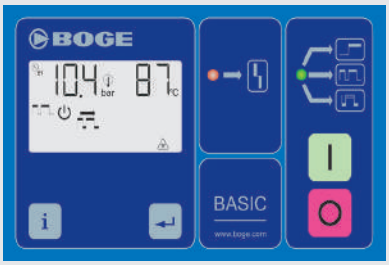
The state-of-the-art compressor: **Extremely quiet, compact & efficient – the „large“ BOGE C series has set industry standard in specific power and sound pressure values. The BOGE compact module enables short distances and less pipelines – for a highly efficient and reliable compressor solution. Depending on your requirements, the C series up to 22 kW can be equipped with refrigerant dryer, frequency control or heat recovery: This is the way compressors are made today!**

INTEGRATED DESIGN

The integration of all essential components in the compact module serves to eliminate pipework and to reduce flow losses: for maximum operating dependability and efficiency!

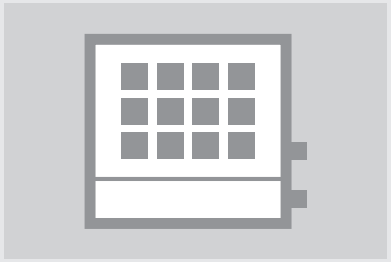
COMPACT EFFICIENCY

The BOGE C series is engineered to generate high free air deliveries in continuous operation and in a incomparably efficient manner. Due to its compact design space requirements are kept to a minimum: an installation surface of less than 1 square metre is sufficient.



CONTROL

BASIC control with LC display and pressure sensor technology is fitted standard. FOCUS control is available as an option and includes an integrated energy efficiency display as well as additional monitoring and control options. FOCUS software now includes a three compressor changeover system.

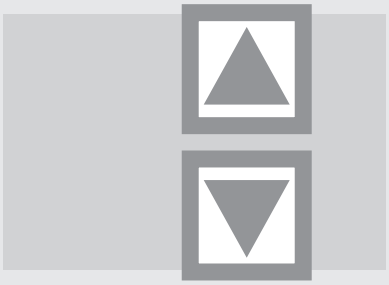


OPTIONAL REFRIGERANT DRYER

The C series can be supplied with an integrated dryer or mounted on top of a horizontal air receiver.

OPTIONAL HEAT RECOVERY

A heat recovery system can be added as an option. Up to 94 percent of the input electrical energy is dissipated through the cooling medium (air or water) and can be recovered for space heating or pre-heating domestic water.



OPTIONAL FREQUENCY CONTROL

The frequency controlled option ensures a continuous volume flow between 25 and 100 percent. This ensures adaptation to the momentary demand of the compressed air system. Soft starting also avoids undue wear and tear and prolongs the service life of the compressor.

Screw compressor **C 10 L** to **C 20 L**

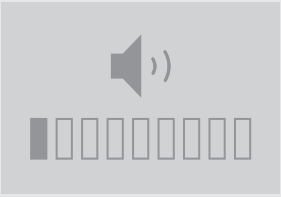
* Free air delivery figures in accordance with ISO 1217, Appendix C, at 20ºC ambient temperature and maximum pressure. Emitted sound pressure levels from 59,5 dB(A) according to DIN EN ISO 2151:2009
** Max. pressure of the compressor

Screw compressor **C 15** to **C 30**
Compressed air station **C 15 D** to **C 30 D**

Effective free air delivery:
1.33 – 3.729 m³/min, 22 – 131 cfm
Pressure range: 7,5 to 13 bar, 110 to 190 psig
Motor range: 11 – 22 kW, 15 – 30 HP



MAXIMUM EFFICIENCY
The BOGE C series up to 22 kW is characterised by its industry leading specific power ratios. You rarely come across such compact screw compressor efficiency.

EXTREMELY QUIET
All C series compressors feature very low sound pressure levels.

REFRIGERANT DRYERS
The C series screw compressors can include an integrated refrigerant dryer for high quality compressed air. No additional footprint is required.

CONTROL
The compressor is controlled by the BASIC control system with LC display and pressure sensor technology.The FOCUS control system is available as an option.

Real winners: **The belt driven C series models up to 22 kW are highly efficient and extremely quiet in operation requiring only a minimum footprint. The footprint is even kept to a minimum with the C D series which includes an integrated refrigerant dryer. An integrated design means short distances and extremely low pressure losses. As well as generating industry leading outputs, the C series is also very energy efficient.**

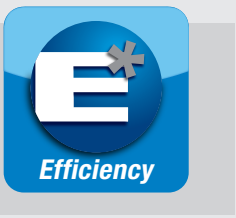
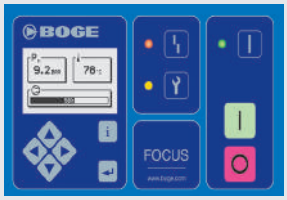
* Free air delivery for the complete package in accordance with ISO 1217, Appendix C, at 20ºC ambient temperature and maximum pressure. Emitted sound pressure values from 63 dB(A) according to DIN EN ISO 2151:2009

** Max. pressure of the compressor

Screw compressor **C 15 F** to **C 30 F**
Compressed air station **C 15 FD** to **C 30 FD**
with frequency control

Effective free air delivery:
0.27 – 3.73 m³/min, 10 – 131 cfm
Pressure range: 7,5 to 13 bar, 110 to 190 psig
Motor range: 11 – 22 kW, 15 – 30 HP





MAXIMUM EFFICIENCY
The BOGE C series up to 22 kW is characterised by its industry leading specific power ratios – for efficient compressed air supply.

FREQUENCY CONTROL
The optional frequency converter ensures a continuous volume flow between 25 and 100 percent. This allows adaptation to the momentary demand of the compressed air system. Soft starting also avoids undue wear and tear and prolongs the service life of the compressor.

REFRIGERANT DRYER
The C series with frequency control includes an integrated refrigerant dryer for extremely high compressed air quality.

CONTROL
The compressor is controlled by the FOCUS control system which includes an integrated efficiency display as well as additional monitoring and control options. FOCUS is programmed as a changeover switch and can control up to three machines.

This is as efficient as it gets: With these frequency controlled belt driven compressors you can rest assure that lower compressed air demand translates into reduced energy consumption with the frequency inverter continuously adjusting the volume flow to the actual demand. This leads to minimised idling times and pressure fluctuations. Soft starting also avoids undue wear and tear and prolongs the service life of the compressor.

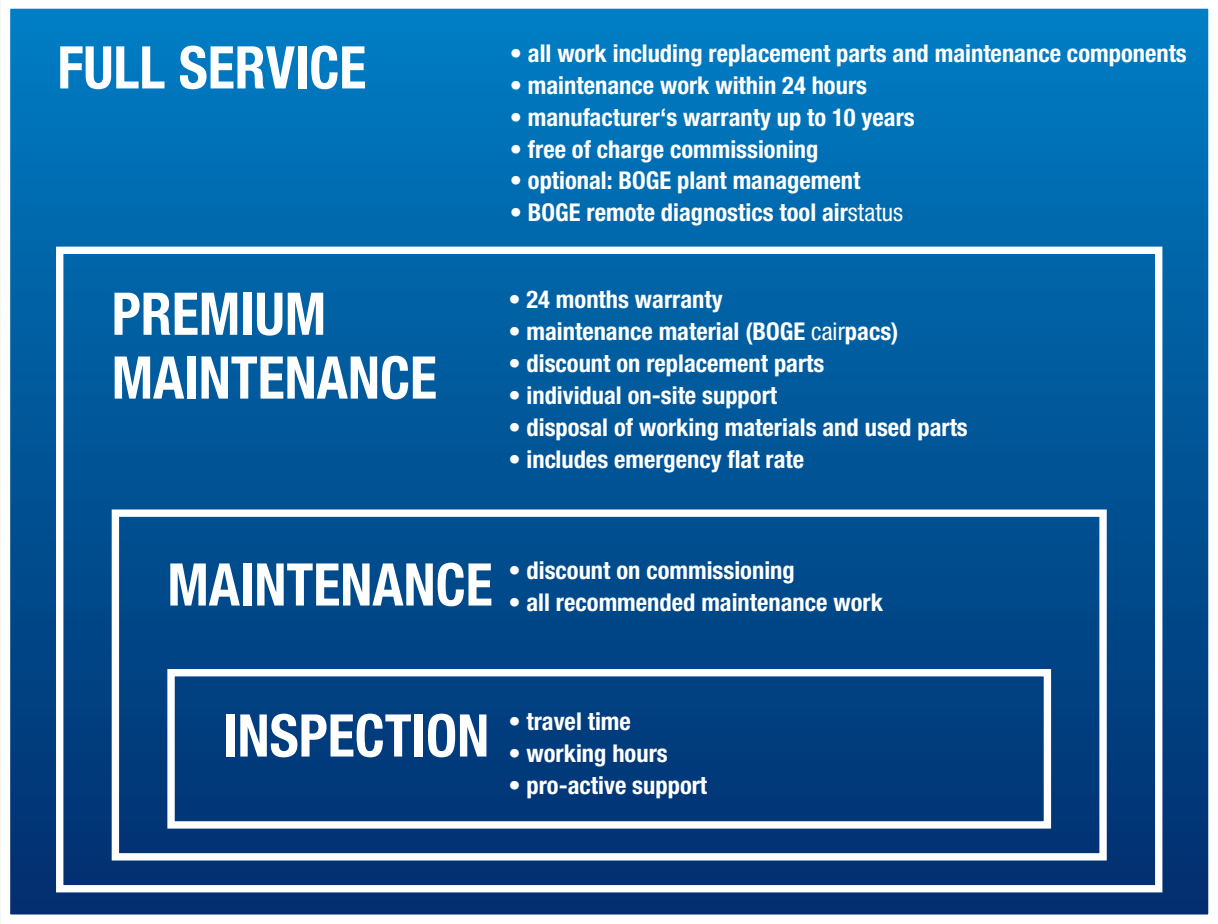
** Max. pressure of the compressor

READY FOR ACTION WORLDWIDE:
BOGE Service Support – Worldwide

PEACE OF MIND NOW COMES IN FOUR PACKAGES!

From inspection to the premium maintenance package – the choice is yours! There is a BOGE maintenance package to meet the level of service cover you require. Once you have selected your maintenance package you can simply sit back and enjoy the peace of mind that comes with maintenance from BOGE.



The contract term on all packages is 24 months. In addition, BOGE best**cair** warranty is also available.
For more information and terms and conditions please contact your BOGE service consultant.

Service your added value! Maximised reliability and economic efficiency are not the only technical advantages that BOGE has to offer. Our comprehensive service support program will ensure your BOGE compressed air system remains in tip top condition. Wherever you need us, whatever we can do for you: BOGE Service Support is always readily available close by – competent, to the highest standards, and always one step ahead.

BOGE BESTCAIR

BOGE **best**cair enables you to extend your factory warranty up to 5 years: 2 years factory warranty with 3 years additional **best**cair warranty – the choice is yours. Furthermore, **best**cair ensures manufacturer's recommended maintenance schedule of new and existing equipment at the specified service intervals.
For more information email
bestcair@boge.com

BOGE GENUINE PARTS

Only original BOGE spare parts have the manufacturer's technological edge. You can be confident when opting for BOGE original spare parts in the service of your BOGE compressed air system will ensure that the integrity of the compressor is maintained, efficiency is retained and your peace of mind is sustained.

ALWAYS NEARBY

BOGE has a network of dedicated service technicians and certified partners at its disposal to help you worldwide with your installation, upgrading, commissioning or approval, maintenance, repair, or inspection:
You can rely on the know-how and experience of our qualified experts – at all times.
Hotline Mobile Service: +49 5206 601-130

EMERGENCY ASSISTANCE

In the case of an emergency where immediate technical support is required, the BOGE product support trouble shooters or the BOGE Helpline team are available to you 24/7.
Product Support Hotline:
+49 5206 601-140
BOGE Helpline: +49 170 4400444

AIR AUDITS

By analysing your existing compressed air system, our energy efficiency experts can identify where savings can be made. The BOGE AIReport includes measurement of: dew point control, vibration control, leakage, noise, oil check and TAN check.

TRAINING COURSES

The BOGE Compressed Air College was established in order to train and certify internal employees and external partners as qualified BOGE Service Technicians. Attendance of training courses held in the in-house training centre further assist in refreshing existing BOGE Service Technician's knowledge at regular intervals.

BOGE COMPRESSED AIR SYSTEMS

BOGE AIR. THE AIR TO WORK.

For four generations, customers from mechanical engineering, industry and trade have relied on BOGE know-how when it comes to planning, developing and manufacturing compressed air systems. They are fully aware of the fact that BOGE AIR is more than just ordinary compressed air: utmost safety, outstanding efficiency, excellent quality, maximised flexibility along with dependable service are the ingredients to transform BOGE AIR into air to work with – in Germany, in Europe and in more than 120 countries around the world.

Our ranges of services include the following:

- Energy efficient systems development
- Plant design and engineering
- System control and visualisation
- Oil-free piston and screw compressors
- Oil injected screw compressors and oil lubricated piston compressors
- Compressed air treatment
- Compressed air distribution and storage
- Compressed air accessories
- Compressed air service
